

CLIENT

India unit of global leader in steel ball manufacturing

THE PROBLEM

The company was using an imported product which was expensive and had long delivery periods. The client was looking for a standard local alternative

OPERATING CONDITION

Process	Steel ball oil lapping
Wheel type	Bakelite
Ball size	2mm -0.5 inch
Coolant system	magnet filter with nozzle spray
Product in use	Imported competitor product

THE SOLUTION

We introduced **Superlap-09** with the following properties:

- + Formulated from selective base stocks with viscosity and high paraffin content
- + incorporated vegetable ester based polishing additives
- + Low foaming
- + Non toxic and non hazardous

(Trial Results Of Superlap-09)
